RUBICOMM

When Passion Meets Business...

OMM is a team of professionals united by a very special brand of passion, desire and expertise that inspires us to overcome limitations and challenge the conventions within our industry.

By setting ourselves ever more ambitious targets we aim to raise the bar required for success in motorsport, thus providing our discerning customers with a crucial advantage.

Expertise and Reliability...

Benefiting from a wealth of specialist expertise gained over many years, our engineers are able to provide an unrivalled standard of maintenance to our entire fleet of off-road vehicles. We aim to exceed our customers' expectations by making the effects of our work instantly evident on the test track.

No Compromises...

OMM's state-of-the-art headquarters is located on over 2 hectares in Poznan's Niepruszewo. The entire creative process for each one of our vehicles is carried out within this extensive infrastructure, from the inception and development of the initial design to its meticulous assembly in our production suite and the rigorous testing programme it will undergo on our custom on-site test track. Our belief that 'only the very best is acceptable' is evident throughout our organisation. For the OMM Team compromise is never an option.

When Imagination Becomes Reality...

The latest addition to the OMM family is the RUBICOMM. It is the perfect fusion of style and performance, with head-turning aesthetics and exceptional extreme off-road capabilities that are a match for even the most arduous terrain. Get behind the wheel of RUBICOMM and you have the whole world at your fingertips. The only limit is your imagination.

Adrenaline...

...and the excitement of conquest.

Engine: LS3 CHEVROLET CORVETTE TURNKEY
Capacity: 7200 ccm
Power: 640 KM
Torque: 850 nm
0-100 Km/h: 5,9 s.

Lightweight Construction Combined with Massive Power...

We believe that cars should be fun. And it is with this belief that we have created RUBICOMM.

The lightweight construction provides not only exceptional manoeuvrability but also remarkable strength to ensure optimum safety. When combined with one of our high performance engines RUBICOMM boasts both incredible power and agility to afford the ultimate driving experience.

Furthermore, to ensure that RUBICOMM continues to excel over difficult terrain at high speeds, we have achieved a centre of gravity that is significantly lower than that of the average conventional passenger car. Whether you are a serious motorsport competitor or just seeking the thrill of off-road adventure on the weekend, you'll immediately appreciate the advantage of having this close control when pushing the extremes!

Design Is Only Limited By Imagination...

Our philosophy is to build exceptional vehicles that give the opportunity to reach places once thought inaccessible and to live the excitement previously unattainable. We believe that each person is unique, with a unique definition of perfection. Therefore, we offer a select range of options to customize/create your own RUBICOMM, because RUBICOMM should be as unique as the individual who owns it.

Exemplary engines:

Model:	LS3 CHEVROLET CORVETTE
Capacity:	6200 ccm
Power:	450 KM

Model:	BMW M57
Capacity:	3000 ccm
Power:	300 KM

Model:	NISSAN RD28
Capacity:	2800 ccm
Power:	150 KM

A map showing the location of the OMM Main office. The map includes the cities Berlin, Poznań, and Warszawa. The A2 highway is shown connecting Berlin and Warszawa. The BUK region is also indicated. The OMM Main office is marked with a red location pin on ul. Modrzewiowa in Niepruszewo. Other streets shown include ul. Poznańska and ul. Świdkowska.
